PROFESSIONAL SUMMARY

Azure Data Engineer with 4.5+ years at Tata Consultancy Services, including a recent promotion to Senior Data Engineer on the Rolls-Royce Digital account. Hands-on with PySpark, SQL/T-SQL, Python, Azure Databricks, Azure Data Factory, Delta Lake and Unity Catalog. Built Bronze, Silver and Gold data layers for reporting; improved a Spark pipeline from 52 to 14 minutes and reduced Azure costs by approximately 40%.

TECHNICAL SKILLS

Programming and processing: PySpark, Apache Spark, Spark SQL, Python, SQL/T-SQL

Azure data platform: Azure Databricks, Azure Data Factory, Azure Data Lake Storage, Azure Blob Storage, Delta Lake, Unity Catalog

Data engineering: ETL/ELT, data warehousing, dimensional data modeling, medallion architecture, data quality validation, data governance, access control, lineage

Delivery and supporting tools: Git, Azure DevOps, Docker, MS SQL Server, MySQL, FastAPI, Pytest; DevOps team collaboration on pipeline CI/CD

Learning exposure: Azure Synapse Analytics, Azure Event Hubs, Apache Kafka, Apache Airflow, PostgreSQL

PROFESSIONAL EXPERIENCE

Tata Consultancy Services | Dec 2021–Present

Senior Data Engineer | Mar 2026–Present • Data Engineer | Dec 2021–Feb 2026

Rolls-Royce Digital account

Engine History Analysis | 2024–Present

- Built ADF and Databricks/PySpark ETL/ELT pipelines across Delta Lake Bronze (ingest raw data), Silver (clean, normalize and validate) and Gold (apply business logic and dimensional models for reporting and insights).
- Applied quality checks across the medallion layers to improve the reliability of curated reporting datasets.
- Used Unity Catalog for centralized data governance, fine-grained access control and lineage across Databricks workspaces.
- Resolved data skew in high-volume Spark joins with key salting and Adaptive Query Execution, reducing runtime by approximately 73% (52 to 14 minutes) and eliminating recurring executor out-of-memory failures.
- Reduced Azure costs by approximately 40% through Databricks cluster right-sizing, resource optimization and reusable, parameterized ADF workflows.
- Collaborated with the DevOps team during Azure DevOps CI/CD builds for ADF and Databricks pipelines; developed working knowledge of YAML and Git branching.

Assumptions Management | 2022–2024

- Developed FastAPI services with role-based access control and Azure API Management; used Docker to standardize service deployment across environments.
- Improved backend performance by approximately 30% with Redis caching and database logic optimization; worked with MS SQL Server and Azure Blob Storage.
- Addressed SonarQube findings and wrote Pytest unit tests; collaborated with cross-functional teams using Azure DevOps Boards and Agile delivery practices.

CERTIFICATIONS

Microsoft Certified: Fabric Data Engineer Associate (DP-700) | Microsoft Certified: Azure Data Fundamentals (DP-900)

EDUCATION

B.Tech, Mechanical Engineering | Bhilai Institute of Technology, Durg | 2021
