

Aditya Malviya

AZURE DATA ENGINEER

Mumbai, India | +91 8555981411 | adityamalviya04692@gmail.com | [linkedin.com/in/adityamalviya04692](https://www.linkedin.com/in/adityamalviya04692) | github.com/adityamalviya04692 | [Portfolio](#)

PROFESSIONAL SUMMARY

Data Engineer with **4.5+ years** architecting and productionizing large-scale **ETL/ELT** pipelines on Microsoft Azure for enterprise clients, including Rolls-Royce. Core expertise in **PySpark**, **Azure Databricks**, **Azure Data Factory**, and **SQL/T-SQL**, with hands-on experience building **medallion-architecture (Bronze/Silver/Gold)** lakehouses, **Unity Catalog** governance, and **CI/CD-driven** pipeline deployment using **Docker**. Cut Azure cloud costs by **~40%**, reduced Spark pipeline runtime by **~73% (52 to 14 minutes)** through data-skew remediation, and improved backend application performance by **~30%** on production systems.

SKILLS

Core Data Engineering:

PySpark, SQL/T-SQL, Data Engineering, ETL/ELT, Python, Azure Databricks, Azure Data Factory (ADF), Data Warehousing, Data Modeling, Unity Catalog, Data Quality Frameworks (Medallion Architecture), CI/CD for Data Pipelines, Docker

Supporting Tools & Platforms:

Apache Spark, Spark SQL, Delta Lake, Azure Data Lake, Azure Blob Storage, Azure DevOps, MS SQL Server, FastAPI, REST API Development, Redis Cache, Git, SonarQube, Pytest, Agile/Scrum

PROFESSIONAL EXPERIENCE

Data Engineer & Backend Developer — Tata Consultancy Services Dec 2021 – Present

Rolls-Royce Digital Account

Engine History Analysis (2024 – Present)

- Architected end-to-end **ETL/ELT** pipelines using **Azure Data Factory**, **Azure Databricks**, and **PySpark**, building a **medallion-architecture (Bronze/Silver/Gold)** lakehouse with layer-wise **data quality** validation and **dimensional data models** for downstream reporting.
- Implemented **Unity Catalog** for centralized data governance, fine-grained access control, and lineage tracking across Databricks workspaces, standardizing secure data access for downstream analytics teams.
- Diagnosed and resolved severe data skew in high-volume Spark join operations by implementing key salting and enabling Adaptive Query Execution (AQE), cutting pipeline runtime by **~73% (52 to 14 minutes)** and eliminating recurring executor out-of-memory failures.
- Reduced Azure cloud costs by **~40%** by optimizing resource utilization, streamlining Databricks cluster configuration, and building reusable, parameterized **ADF** workflows for long-term maintainability.
- Set up **CI/CD pipelines for data engineering workflows** (ADF pipeline JSON + Databricks notebook deployments) using Azure DevOps, YAML, and Git branching strategies to automate controlled releases across dev, staging, and production.

Assumptions Management (2022 – 2024)

- Delivered production-grade **FastAPI** backend services with Role-Based Access Control (RBAC) and Azure API Management for enterprise users, and containerized services with **Docker** to standardize deployment across development, staging, and production environments.
- Improved application performance by **~30%** through Redis-based caching, optimized backend/database logic, and structured logging; managed application state using MS SQL Server, Redis Cache, and Azure Blob Storage.
- Ensured code quality and security by resolving SonarQube hotspots and technical debt, achieving high test coverage through rigorous Pytest unit testing.
- Collaborated within Agile/Scrum teams, managing tasks in Azure DevOps Boards with cross-functional stakeholders.

FREELANCE PROJECTS

Moriveda — Pan-India D2C Commerce Platform (moriveda.in) · solo full-stack build May – Jun 2026

- Delivered a live pan-India storefront in **21 days end to end** — UX research, frontend design and code, backend, 7-table MySQL schema, infrastructure and worldwide release; **first paid order on launch day**.
- Hand-built with no framework: dual payment rails (**Razorpay + COD**, webhook-verified), dual auth (**phone OTP + Google OAuth**), automated AWB dispatch via iThink Logistics, coupon engine, SMTP and a custom admin operations dashboard.

CERTIFICATIONS

Microsoft Certified: Azure Data Fundamentals (DP-900) | Microsoft Certified: Fabric Data Engineer Associate (DP-700)

EDUCATION

B.Tech, Mechanical Engineering — Bhilai Institute of Technology, Durg | 71% | 2021 Languages: Hindi, English, Telugu, Bengali
